

# District Manager

## The Key to Successful School Data Management for School Districts

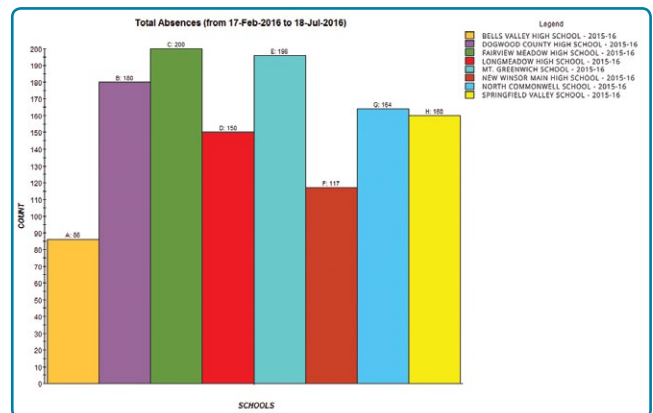

Rediker Software's **District Manager** for Administrator's Plus provides your district office with instant access to live student and staff data from all schools within your district.

- Control all schools within your district.
- Configure district fields as you decide which programs you want to report on.
- Built-in Administrator's Plus report wizards.
- Easily export any district information to Excel.
- District-wide statistical reporting tools.
- Dashboards and widgets provide real-time, district level snapshots with graphical views.
- Quickly transfer students and their data from one school to another.
- Configure and customize graphical views of data from all schools within your district.
- Registration functionality with district enrollment features.
- Choose previous years to do historical reporting.
- Easily create great looking pivot tables and charts in just a few clicks.
- Manage users on a district level.
